

## DEKO-Master<sup>®</sup>

### Deko-Master<sup>®</sup> Vario

Scissors-type platform manufactured from aluminium-frame with a 22 mm deck, brown or colourless stained and screwed in tightly.

The alu-edge is equipped with nuts so that accessories could be fixed easily.

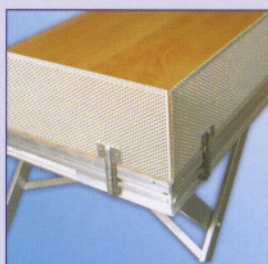

Scissors-construction from steel-tube, coated (standard: black or alu-colour > with additional price every wished RAL-colour is possible).

### Deko-Master<sup>®</sup> Integral

As Vario, but like model Alu-Integral that means height-adjustment at the top-sides of the platform.

The tubes between the feet on the long side - so called bottom-frame - allows the equipment with wheels.

**Deko-Master<sup>®</sup>**  
*equipped with borders  
for sales-events  
(acrylic glass or  
perforated plate)*

#### Technical Details
