Product-Description

Scissors-type platform manufactured from alu-frame with a 22 mm deck, brown stained and screwed in tightly.

The solid alu-edge is equipped with nuts so that accessories like stairs, handrails... could be fixed easily and the platforms one beneath/behind the other could be connected.

Scissors-construction from steel-tube, coated (standard: black).

Assembly

At the top-sides of Alu-Integral M you find levers which must be applied

Integral-M

to move the height-adjustment. A turn of the podium is not necessary. The platforms then are arranged in the wished formation and fixed one beneath/behind the other with connectors.

Accessories

Stairs, handrails, transport-systems ... are available in standard- and special measures.

Furthers details: "System-Accessories".
