

Open-Air-Stage

Fast and easy to install
with roof for

Open-Air events

... in the city or country.

+

Extension Variant

Assembly of the stage (equipped with plug-in-feet > the best with telescopic feet; Scissors-type platforms also possible). Stage elements for outdoor with waterproof decks.

Instalment of the roof-frame.

Mounting and fixation of the 4 beams.

Spread out and put on of the roof-canopy.

Smooth out and fixation of the canopy.

Roof-construction with canopy circa 80 cm pulled up to go on with fixation of the canopy.

In the same working-height the sides- and background-canopies are fixed.

The pulling up of the roof-construction with ahead mounted 4 hand-winches.

Fixation of the roof-construction to the beams.

Assembly of the handrails to the stage and fixation of the facing > then the sides- and background-canopies can be fixed.

Door within the side-canopy and stair (stickable) with balustrade.

Access to the stage on the side or from the background.

Handrails guarantee a safe event on the stage.
